Please scan the QR code or visit www.conspit.com to download Conspit Link 2.0.

The screenshot displays the H3 software interface with several key features highlighted:

- Firmware update:** A red box highlights the download icon in the top left corner.
- Current firmware version number:** A red box highlights the text "V1.00.00001" in the bottom left.
- Calibration of MIN & MAX input position:** A red box highlights the "Calibration" section, which includes a slider with "MIN" and "MAX" buttons. Red arrows point to these buttons with the following instructions:
 - Click "MIN" to calibrate the minimum value when the handbrake is completely released.
 - Click "MAX" to calibrate the maximum value when the handbrake is fully pressed.
- Display of real-time input:** A red box highlights the "Input Monitor" section.
- Mapping curve customizing:** A red box highlights the "Custom Mapping Curve" section, which features a graph with a white curve and four preset options (Preset1 to Preset4).
